

Metropolitan Reporting Bureau Environmental Policy (June 2015)

Metropolitan Reporting Bureau believes that businesses are responsible for achieving good environmental practice and operating in a sustainable manner.

We are therefore committed to reducing our environmental impact and continually improving our environmental performance as a fundamental business strategy and operating methods.

It is our priority to encourage our customers, suppliers and all business associates to do the same. Not only is this sound commercial sense for all; it is also a matter of delivering on our duty of care towards the future.

Policy:

- Support and comply or exceed the requirements of current environmental regulations and codes of practice.
- Minimize our waste recycling as much of it as possible for reuse.
- Minimize energy and water usage in our office and processes in order to conserve supplies, and minimise consumption of natural resources.
- Encourage staff to use public transportation, carpool, bicycle, or walk to our centrally located Center City office.
- Apply the principles of continuous improvement in respect of air, water, noise and light pollution from our premise and reduce impact from our operations on the environment and community.
- Source products and services that do the least damage to the environment and encourage others to do the same.
- Assess the environmental impact of any new processes or products during the development phase.
